

The Running of the Trains

Monday

December 8

5:00PM

SLC238

Students in EE342 Microcomputer Operation and Design have been developing, interfacing, and programming microcontroller based computers throughout the semester. At the Running of the Trains, each will be controlling part of an HO gauge railroad in the laboratory. You are invited to attend and watch the demonstration as we see if the trains will indeed run.

Refreshments will be provided.
